Product Detail

Fidar Tahvieh Iranian is known as one of the three companies producing various types of absorption chillers in Iran, which has been able to design and produce its products based on the latest technology and up-to-date knowledge. All parts used are manufactured according to international standards such as JIS and ASME. شرکت فیدارتهویه ایرانیان به عنوان یکی از ۳ شرکت تولید کننده انواع چیلرهای جذبی در ایران شناخته میشود که توانسته بر اساس جدیدترین تکنولوژی و دانش روز محصولات خود را طراحی و تولید نماید. تمام قطعات مورد استفاده بر اساس

Absorption Chiller

چيلر تراکمي هوا خنک اسکرال | Air Cooled Scroll Liquid Chiller

Cooling Only Fin and Tube Condenser DX Evaporator Capacity : 10 - 120 RT

فيدار تهويه ايرانيان

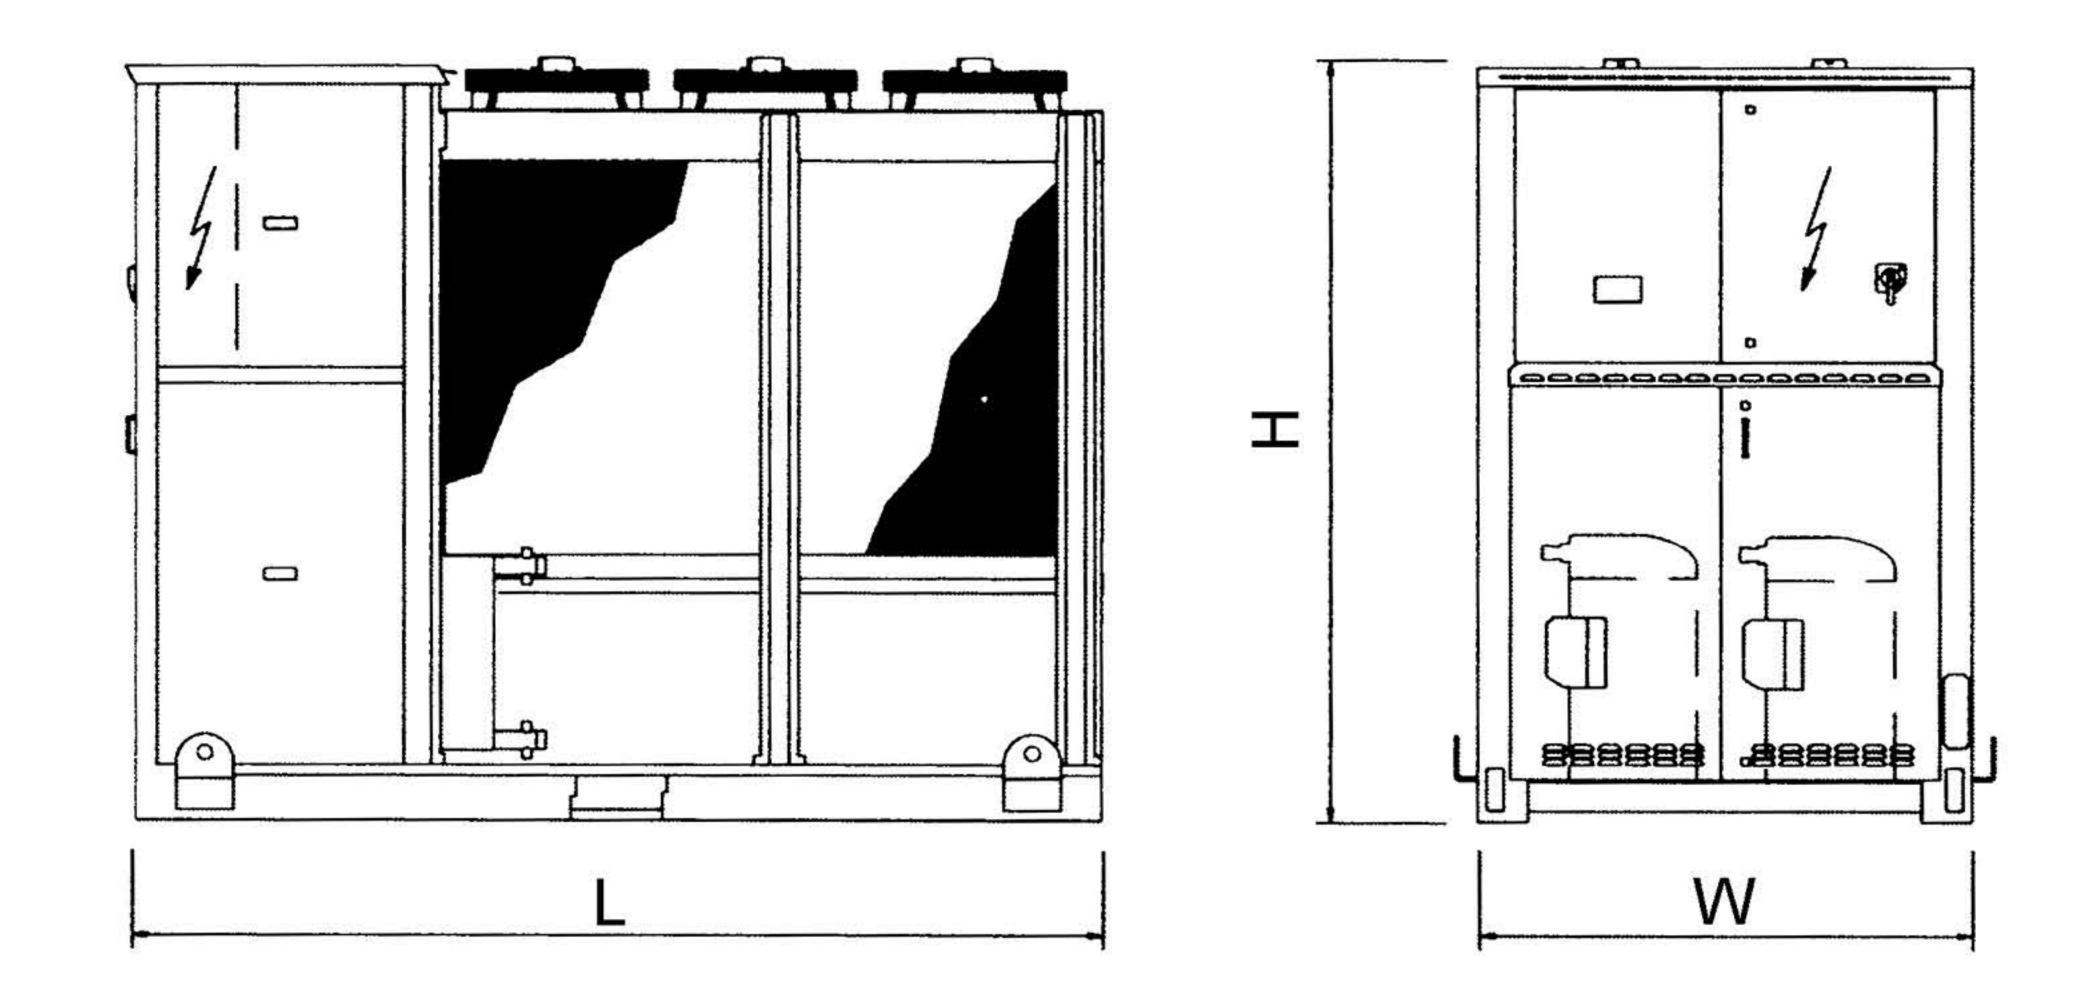

For more details please scan the code

Product Detail

Air cooled water chillers are equipped with scroll compressors, aluminum fin and inner grooved copper tube condensers, dry expansion shell and tube evaporator and electronic expansion valve. Axial fans and v-type condensers are incorporated in their condensers. The chillers are designed and manufactured by F.T.I and suitable to be installed outdoor.

چیلرهای هواخنک مجهز به کمپرسورهای اسکرال،
کندانسورهوایی با فین آلومینیومی و لوله مسی با شیار داخلی،
اواپراتور پوسته و لوله DX و شیر انبساط الکترونیکی می باشند.
از فن های محوری و کویل های ۷ شکل در این کندانسورها
استفاده شده است. چیلرها توسط شرکت فیدار تهویه ایرانیان
طراحی و تولید شده اند و مناسب برای نصب در فضای خارج از
ساختمان می باشند.

Rooftop Packaged Unit

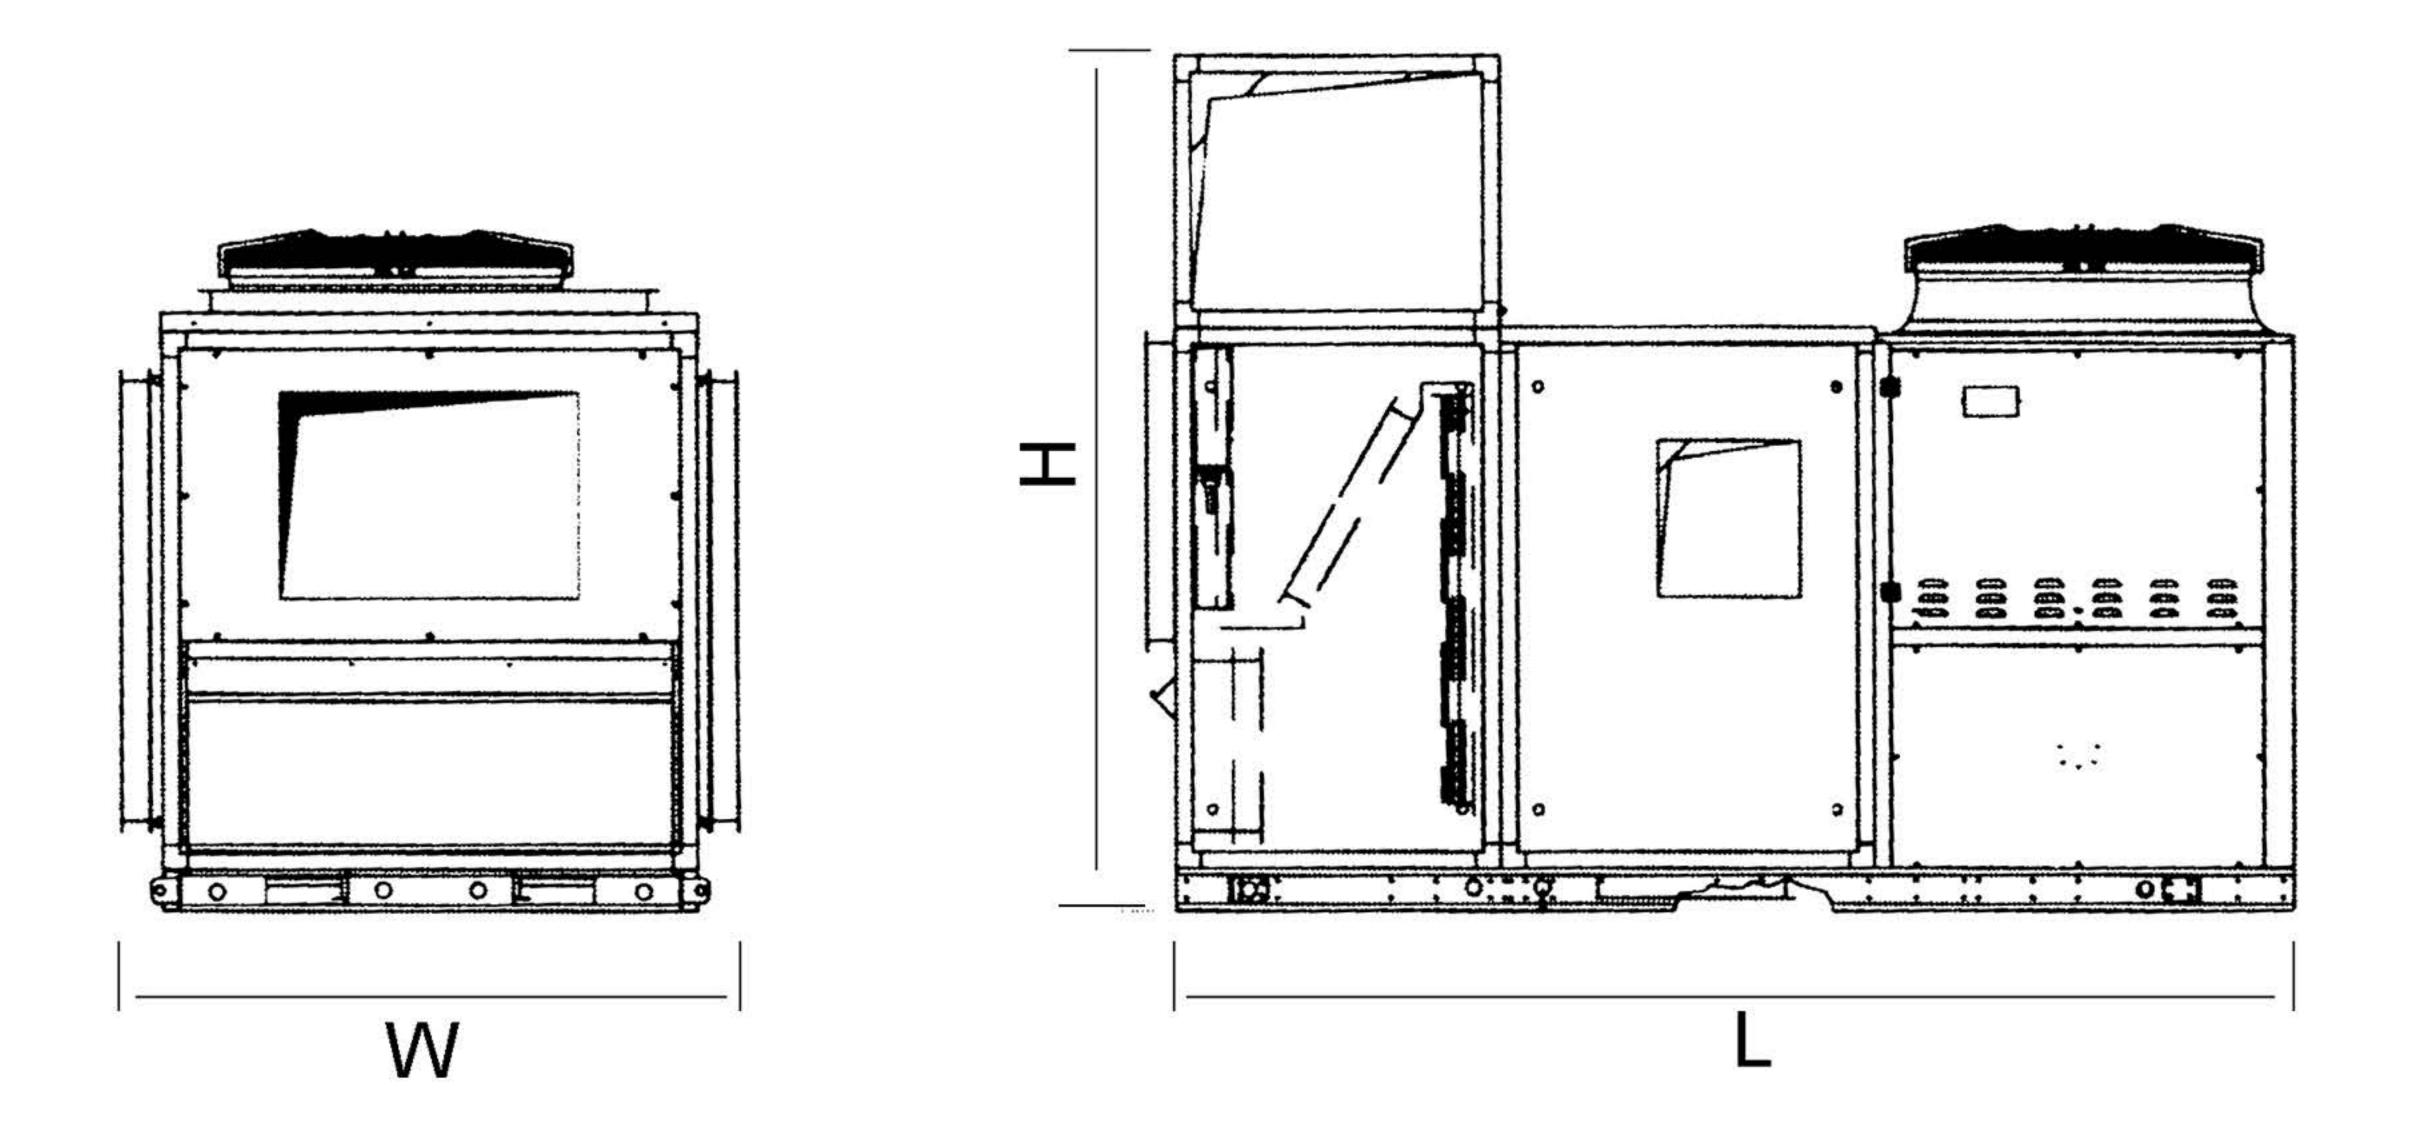

Product Detail

New packaged unit are designed and manufactured to meet all requirements for small and medium residential and commercial environments such as shops, supermarkets, small restaurants, service stations, showrooms, offices, technical rooms and production areas and are built specifically for ducted systems, which will enable them to install easily on roof tops or on the ground. R22, R407C and R410A can be used as refrigerant.

 پکیج یونیت جدید برای مقاصد بار سرمایی کم برای کاربردهای مسکونی کوچک یا متوسط و همچنین تجاری مانند مغازه ها، سوپرمارکت ها، ایستگاه های خدماتی، سالن نمایش، اداره ها، اتاق های فنی و محیط های تولیدی طراحی و ساخته شده است. این پکیج ها مخصوصا برای سیستم داکت طراحی شده ا ند که قابلیت نصب آسان در پشت بام و یا زمین را دارا میب اشند. مبردهای مورد استفاده در این نوع پکیج ها عبارت اند از: . REIOAG REOVC GRYY

Air Cooled Mini CHiller

Cooling Only Fin and Tube Condenser Shell & Tube / Braze Plate Heat Exchanger

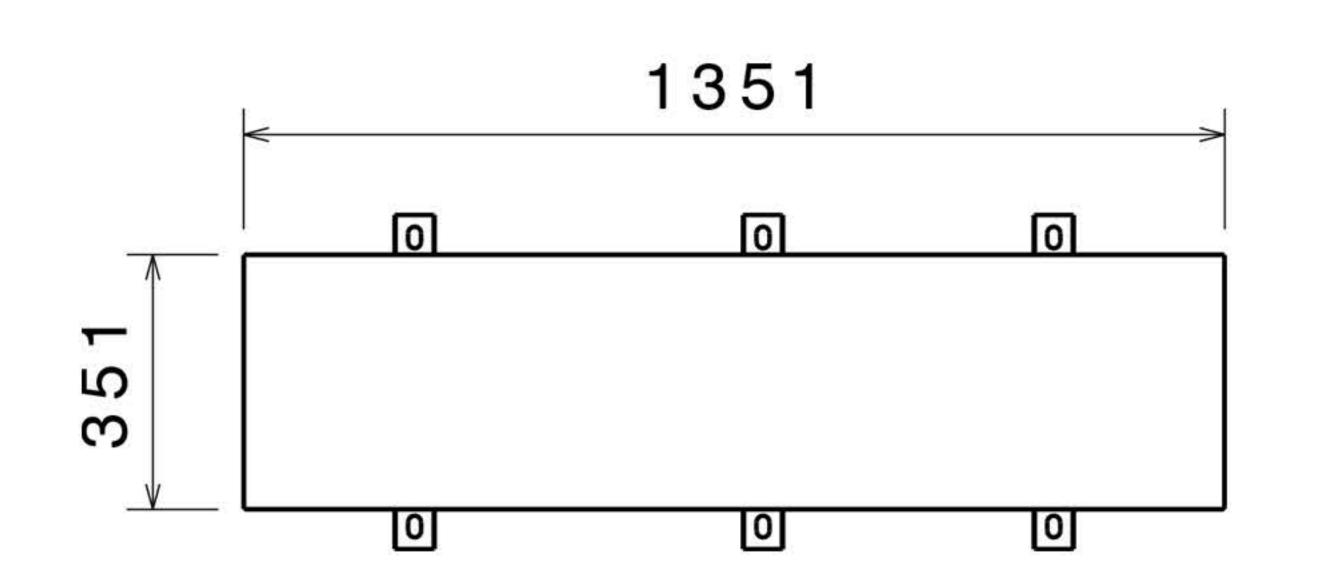

فيدار تهويه ايرانيان

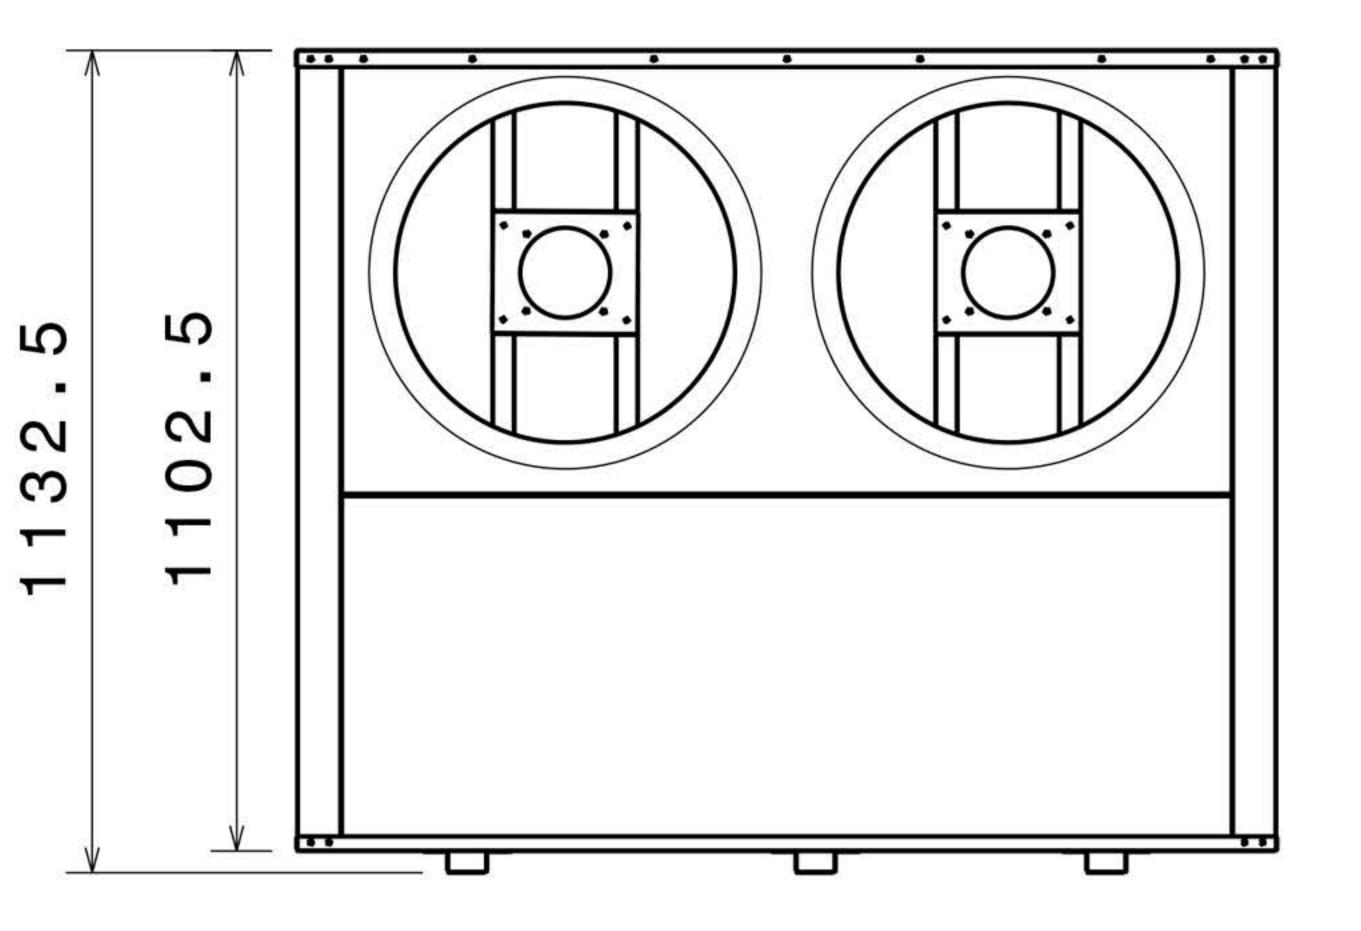

Product Detail

New air cooled mini chillers equipped with scroll compressors, shell and tube and brazed plate heat exchanger satisfy the exact cooling requirements of residential, small and medium size application. They can be used to provide fan coil units with chilled water. High ambient temperature chillers cause them to be used in tropical regions.

• محصول جديد ما مينى چيلرهاى هوا خنک مجهز به کمپرسورهای اسکرال،اواپراتور شل اند تیوب یا صفحه ای می باشند که قادر به سازگار شدن با بار سرمایی دقیق مراکز مسکونی و کاربردهای کوچک و متوسط می باشد. مینی چیلرها می توانند آب سرد فن کویل ها را تامین کنند. این مینی چیلرها با توجه به نوع طراحی شان قابلیت استفاده در مناطق گرم حاره ای را دارد.

Ducted Split

داکت اسپلیت **Ducted Split**

Cooling and Heating Indoor Installation Capacity : 24000 - 60000 BTU/hr.

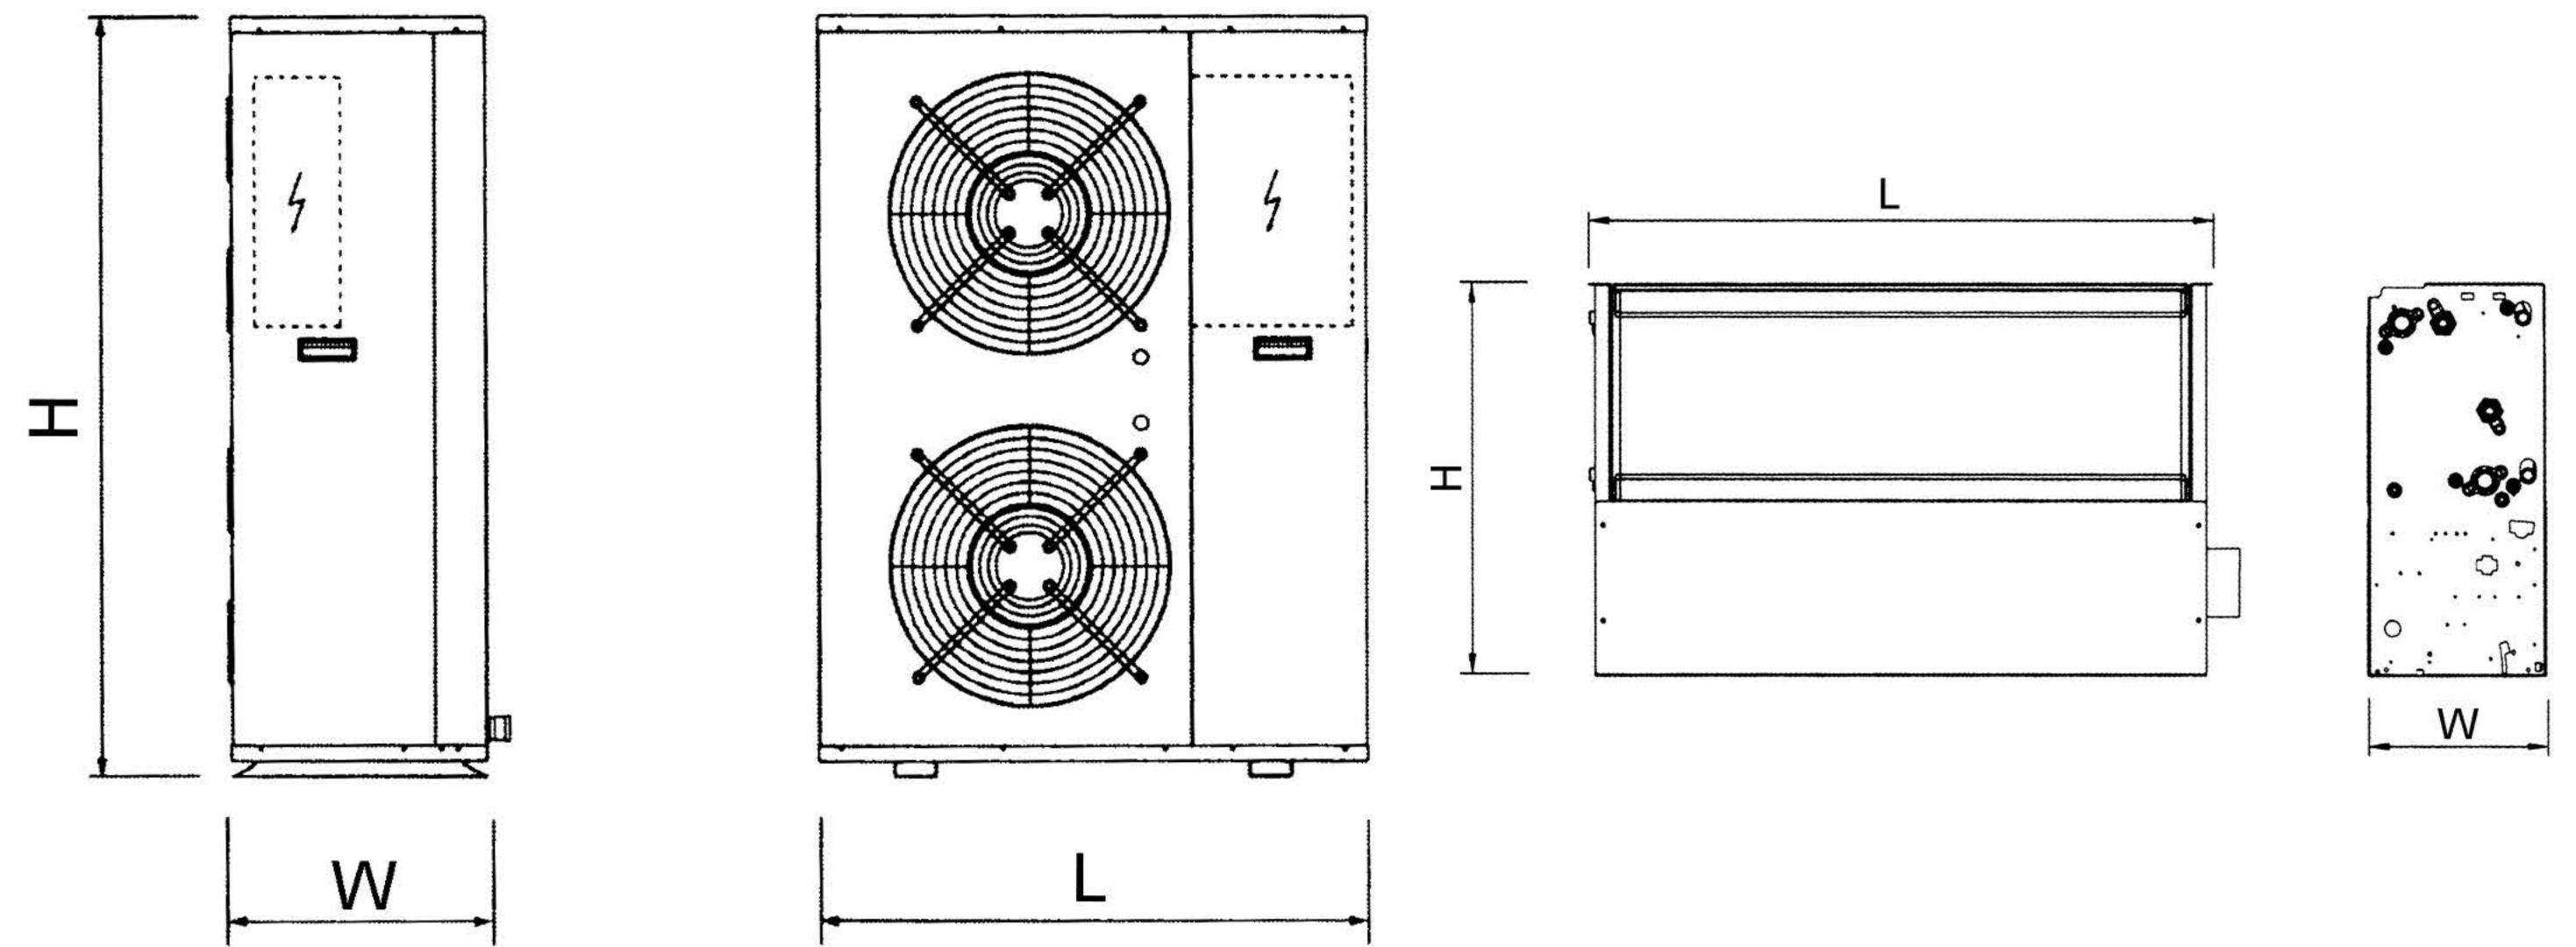

For details more please scan the code

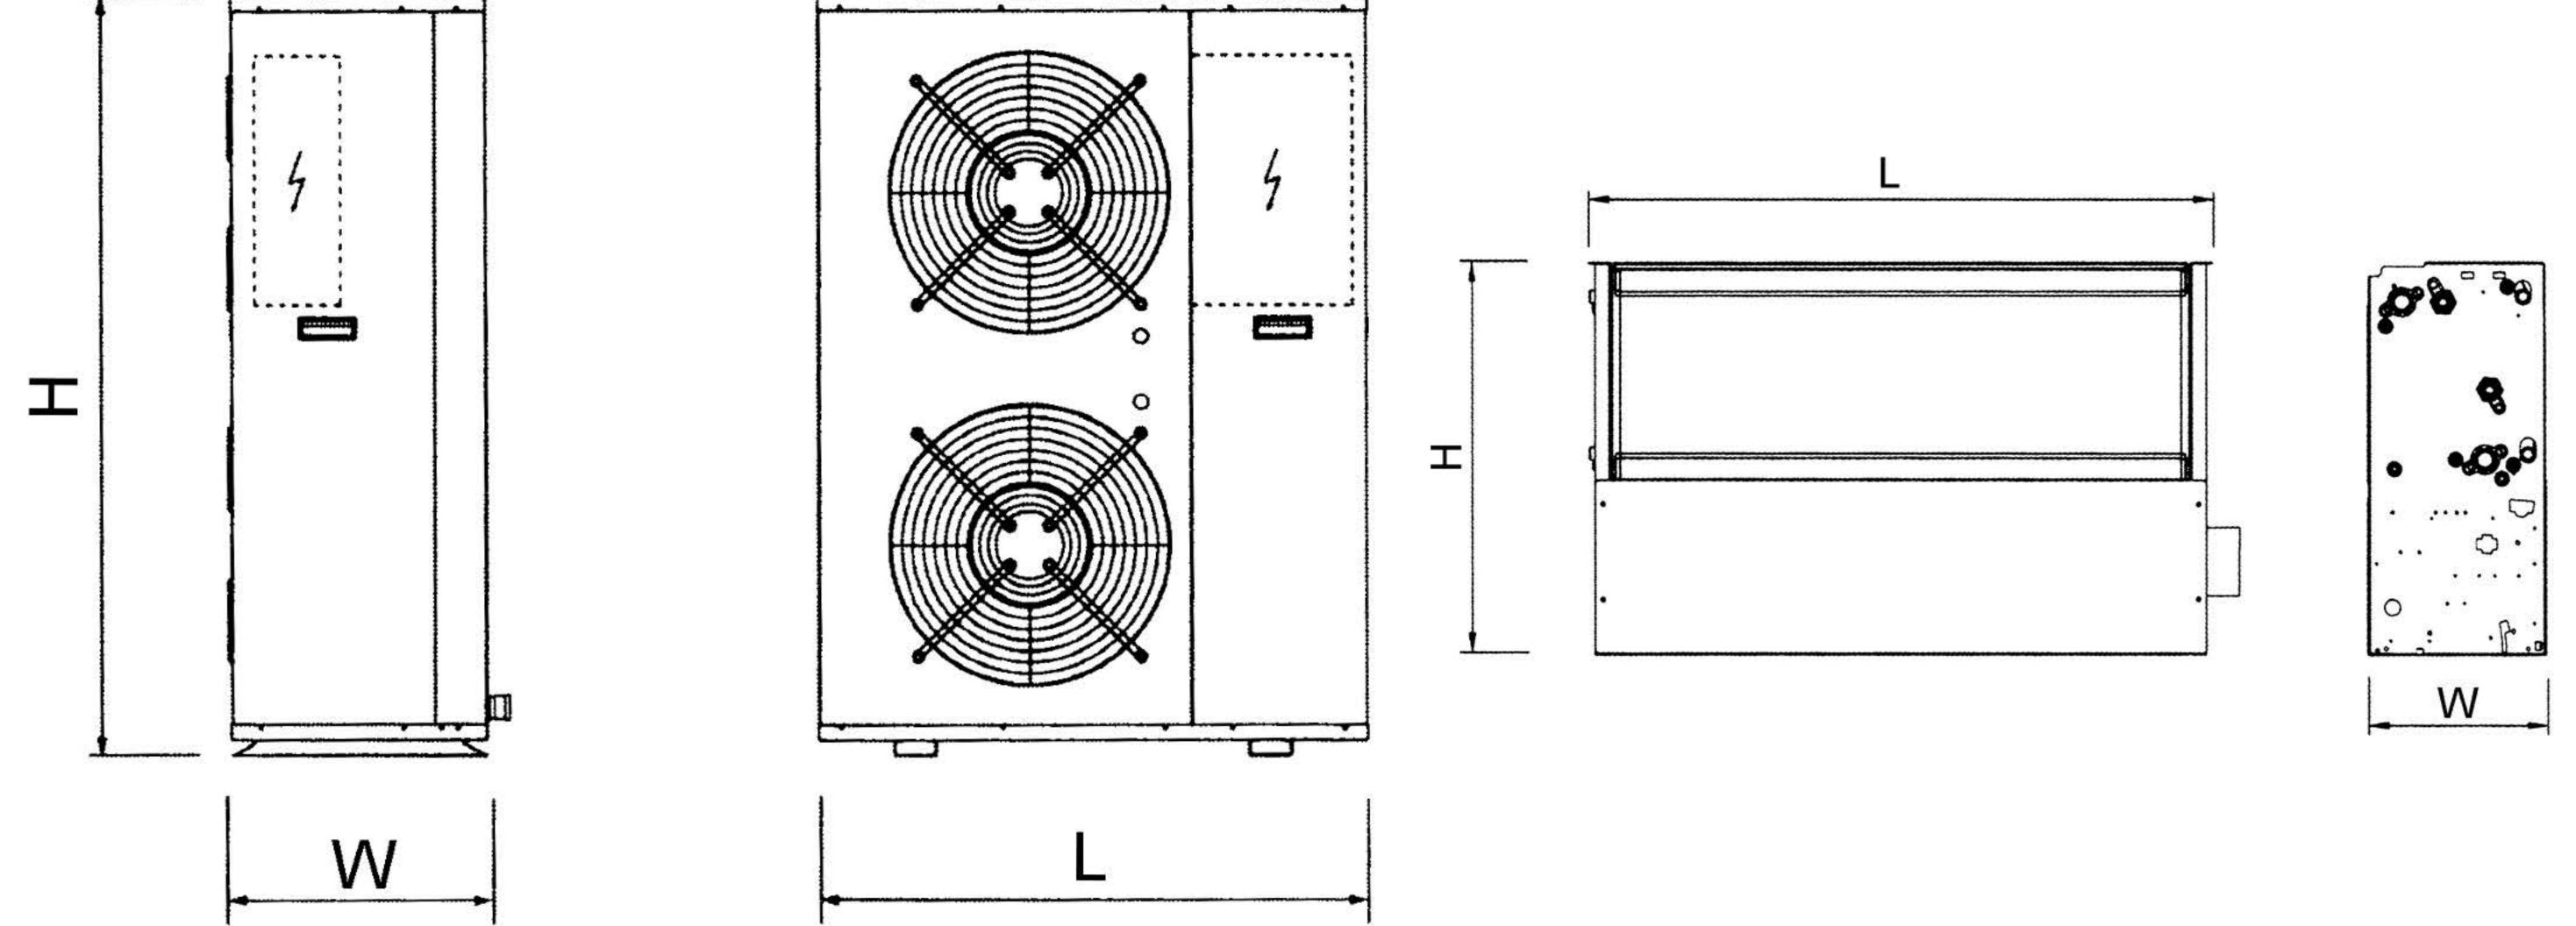

Product Detail

Ducted split systems are one of the most common cooling and heating systems in apartments. Chilled air is supplied in the summer and Heated air in the winter through ducts located in the drop ceiling to provide thermal comfort throughout the building as determined by the thermostat. Essentially, ducted systems are much quieter and more efficient when they are operating. This makes the ducted systems ideal for long-term residents.

• داکت اسپلیت بدون شک یکی از محبوب ترین سیستم های سرمایشی و گرمایشی بشمار میرود. هوای سرد در تابستان و هوای گرم در زمستان توسط یونیت داخلی که معمولا در فضای سقف کاذب تعبیه شده تامین گردیده و توسط سیستم کانال و دریچه های تعبیه شده در فضاهای مختلف توزیع میگردد ، میزان حرارت و برودت تولید شده با استفاده از ترموستات های دیواری کنترل میگردد. صدای کمتر و راندمان بالاتر باعث گردیده این سیستم گزینه ای ایده آل برای استفاده طولانی مدت در فضاهای مختلف باشد.

Ducted Type Fan Coil Indoor Installation

Cooling and Heating

Capacity : 800 - 2000 CFM

For more details please scan the code

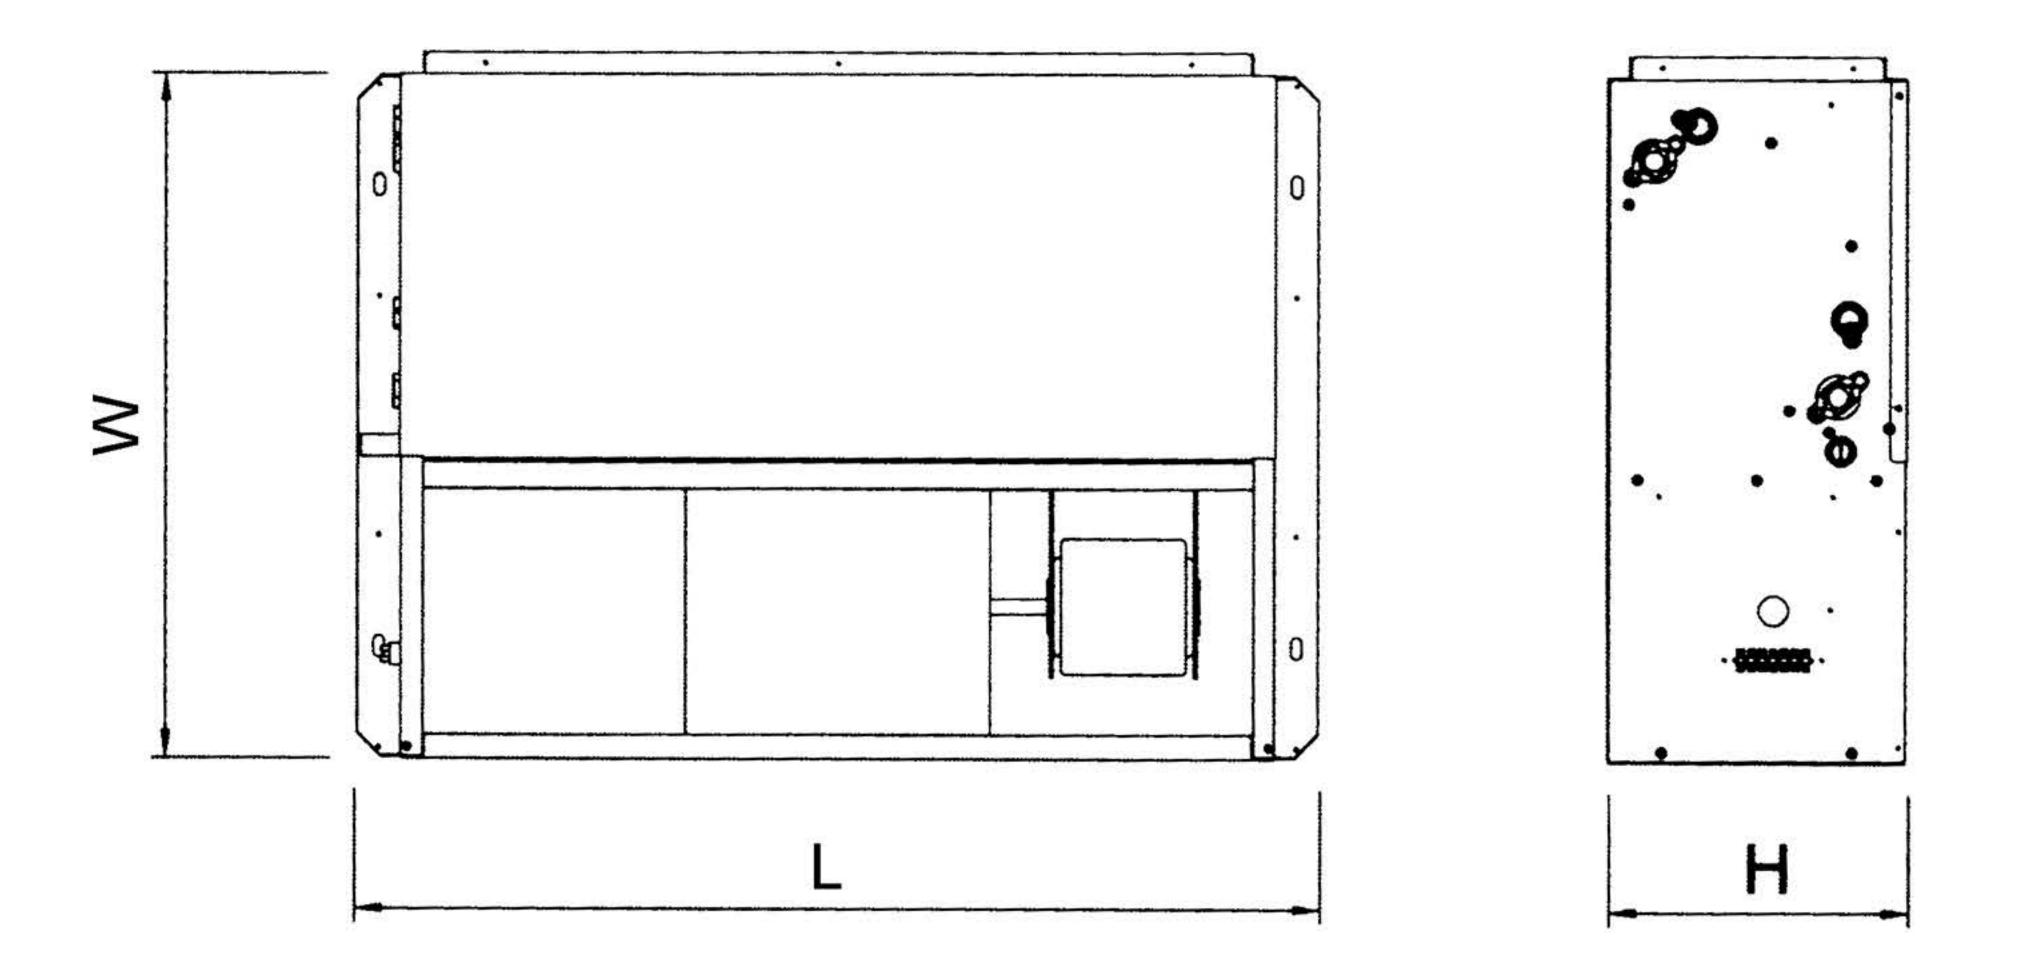

Product Detail

• New Ducted fan coil series are manufactured with high static pressure. They are designed to be used in residential and commercial environment. This type of fan coils cover air flow ranges from 200 to 1200 CFM.3 فن کویل های کانالی سری جدید با فشار استاتیک بالا طراحی و ساخته شده اند. این فن کویل ها برای مقاصد مسکونی و محیط های تجاری مورد استفاده قرار می گیرند و قابلیت تامین هوا از 200 تا 1200 فوت مکعب در دقیقه را دارا می باشند. فن کویل

speed low noise fans can provide more control on cooling and heating capacity, reduce energy cost and make comfortable environment for residence.

های سه سرعته قادر به کنترل دقیق روی سرمایش و گرمایش

Air Handling Units

فيدار تهويه ايرانيان

هواساز

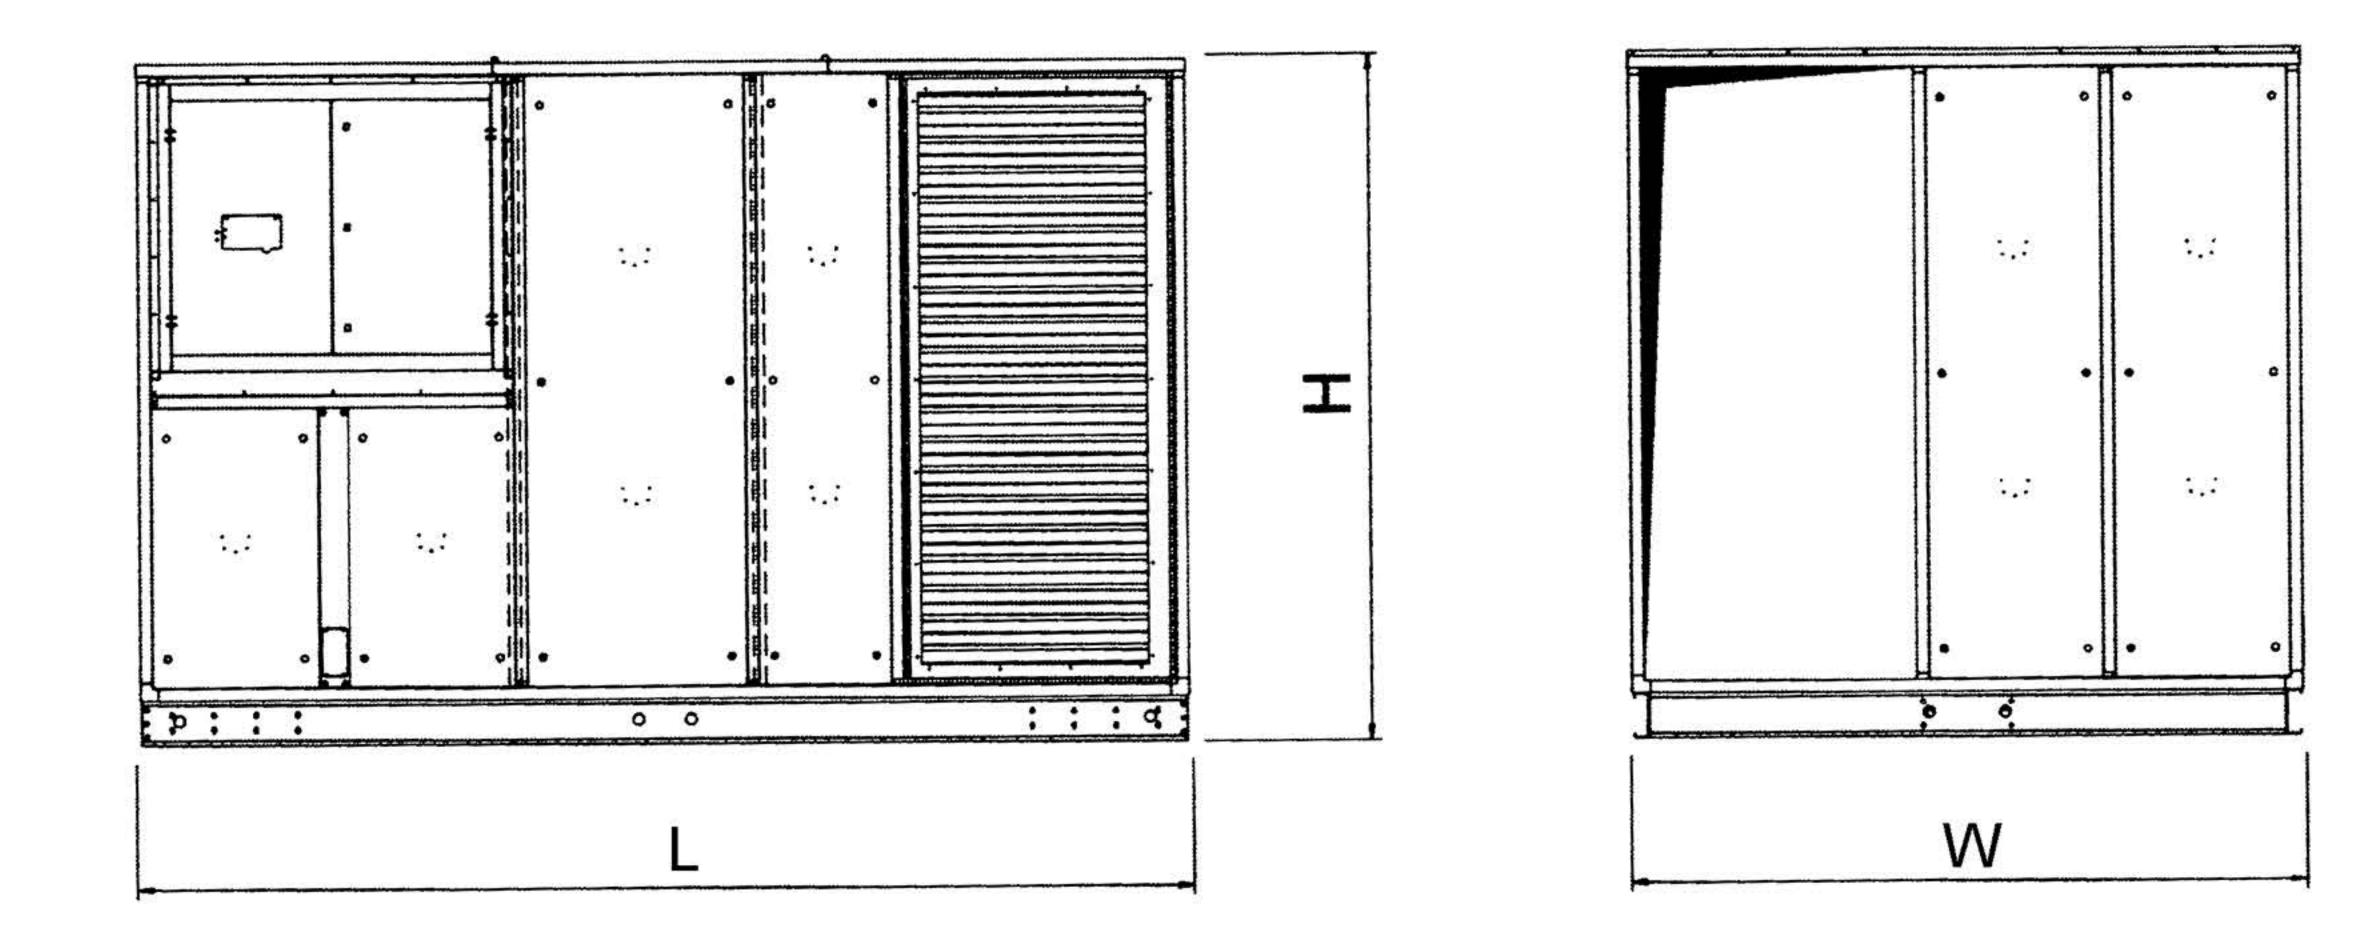

Product Detail

In any commercial buildings like Hospitals, cinemas, theater halls, offices and same applications the very often usable HVAC devices are Air Handling Units. An AHU is a suitable HVAC device to cool, warm, humidify, dehumidify, remove pollution and clean the air. An AHU could be mounted to a condensing unit to make very fantastic devices to provide very comfort conditions in desired area.

• در همه ساختمانهای تجاری مانند هتل ها، سینماها، سالن های تئاتر،اداره ها و موارد مشابه، دستگاهی که بسیار مورد استفاده قرار گرفته است،هواساز می باشد. هواساز همچنین دستگاهی است که در آن فرآیندهای سرمایش، گرمایش، رطوبت زنی، رطوبت گیری، گرد زدایی و تمیز کردن هوا استفاده می شود. هواساز می تواند با کندانسینگ یونیت ترکیب شده و مجموعه ای مناسب برای تهیه هوای مطبوع تولید نمایند.

Air washer Units

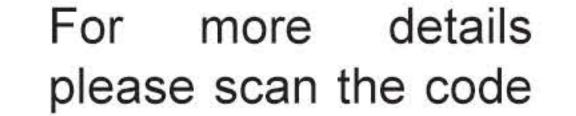

ایرواشر | Air washer Units

Cooling, Heating, Humidifying Indoor and Outdoor Installation Capacity : 2500 - 45000 CFM

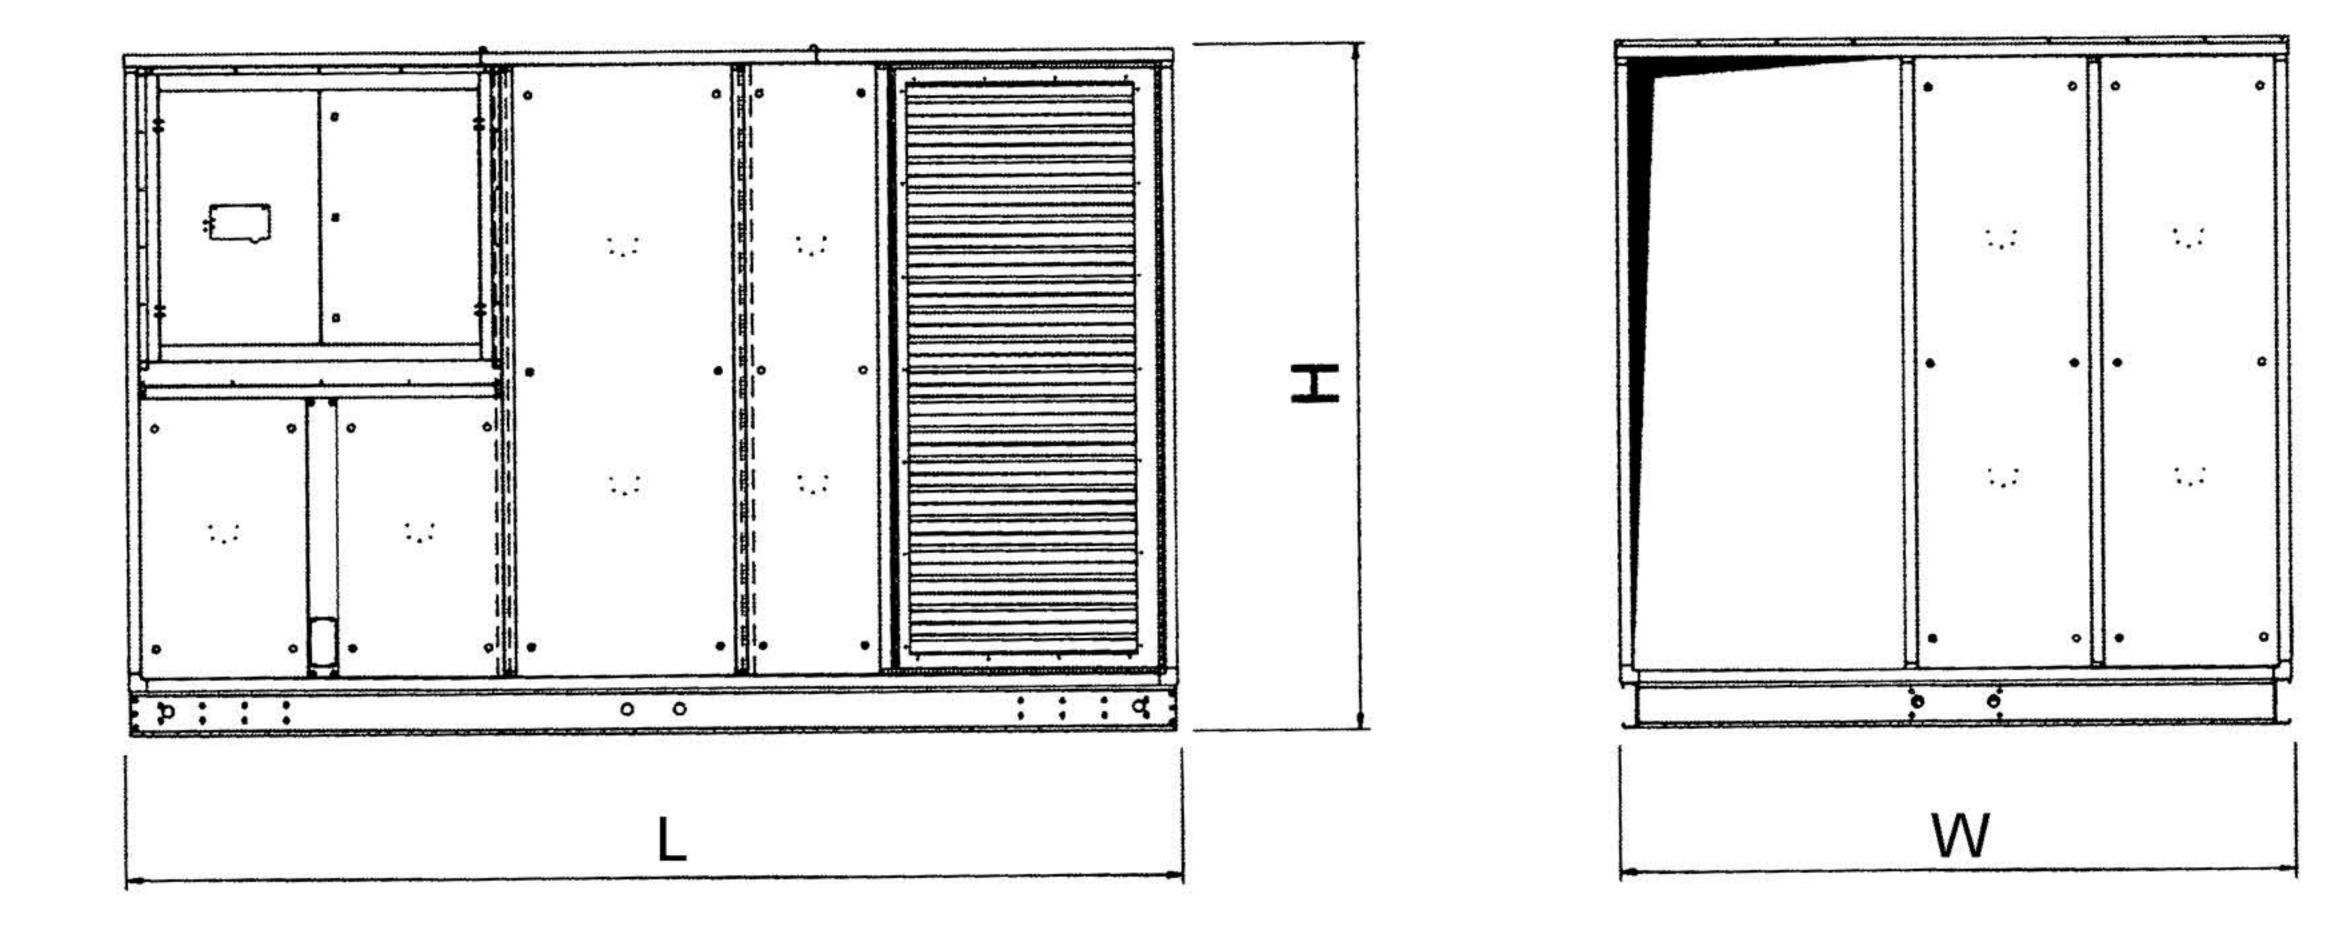

Product Detail

An air washer unit is a machine that sprays water into the stream of air to cool it down. Air washers can be standalone equipment or part of the AHU and other AC systems. Air washer units are available in both apartment and industrial models and come with horizontal or vertical configurations and air supply directions. They may also be equipped with a heating coil.Air washers can be used in most regions with a dry summer .Given that the cooling function of air washer units is based on evaporation (similar to evaporative cooling), they are not expected to provide intense cooling, such as chillers. ایرواشر دستگاهی است که با استفاده از سیستم پاشش آب بر هوای ورودی سبب خنک شدن آن میگردد.آنها میتوانند در پروژه های مختلف تحت عنوان یک دستگاه مرکزی مستقل و یا بخشی از یک دستگاه هواساز مورد استفاده قرار گیرند. از طرفی قابلیت نصب به صورت افقی و عمودی را دارا میباشند و همچنین توزیع هوا در آنها هم بصورت رو به روزن و هم بصورت بالازن میسر است.ایرواشرها قابلیت نصب و استفاده در مناطقی با تابستان خشک و رطوبت نسبی پایین را دارند.با توجه به اینکه عملکرد خنک کنندگی ایرواشرها مشابه کولرهای آبی بر اساس تبخیر آب است نباید از آنها برودتی همچون چیلرها انتظار داشت.

Fiberglass Cooling Tower

برج خنک کندہ فایبرگلاس | Fiberglass Cooling Tower

Fiberglass Cooling Tower Cooling only Air Cooled Outdoor Installation Capacity : 8 - 500 TR

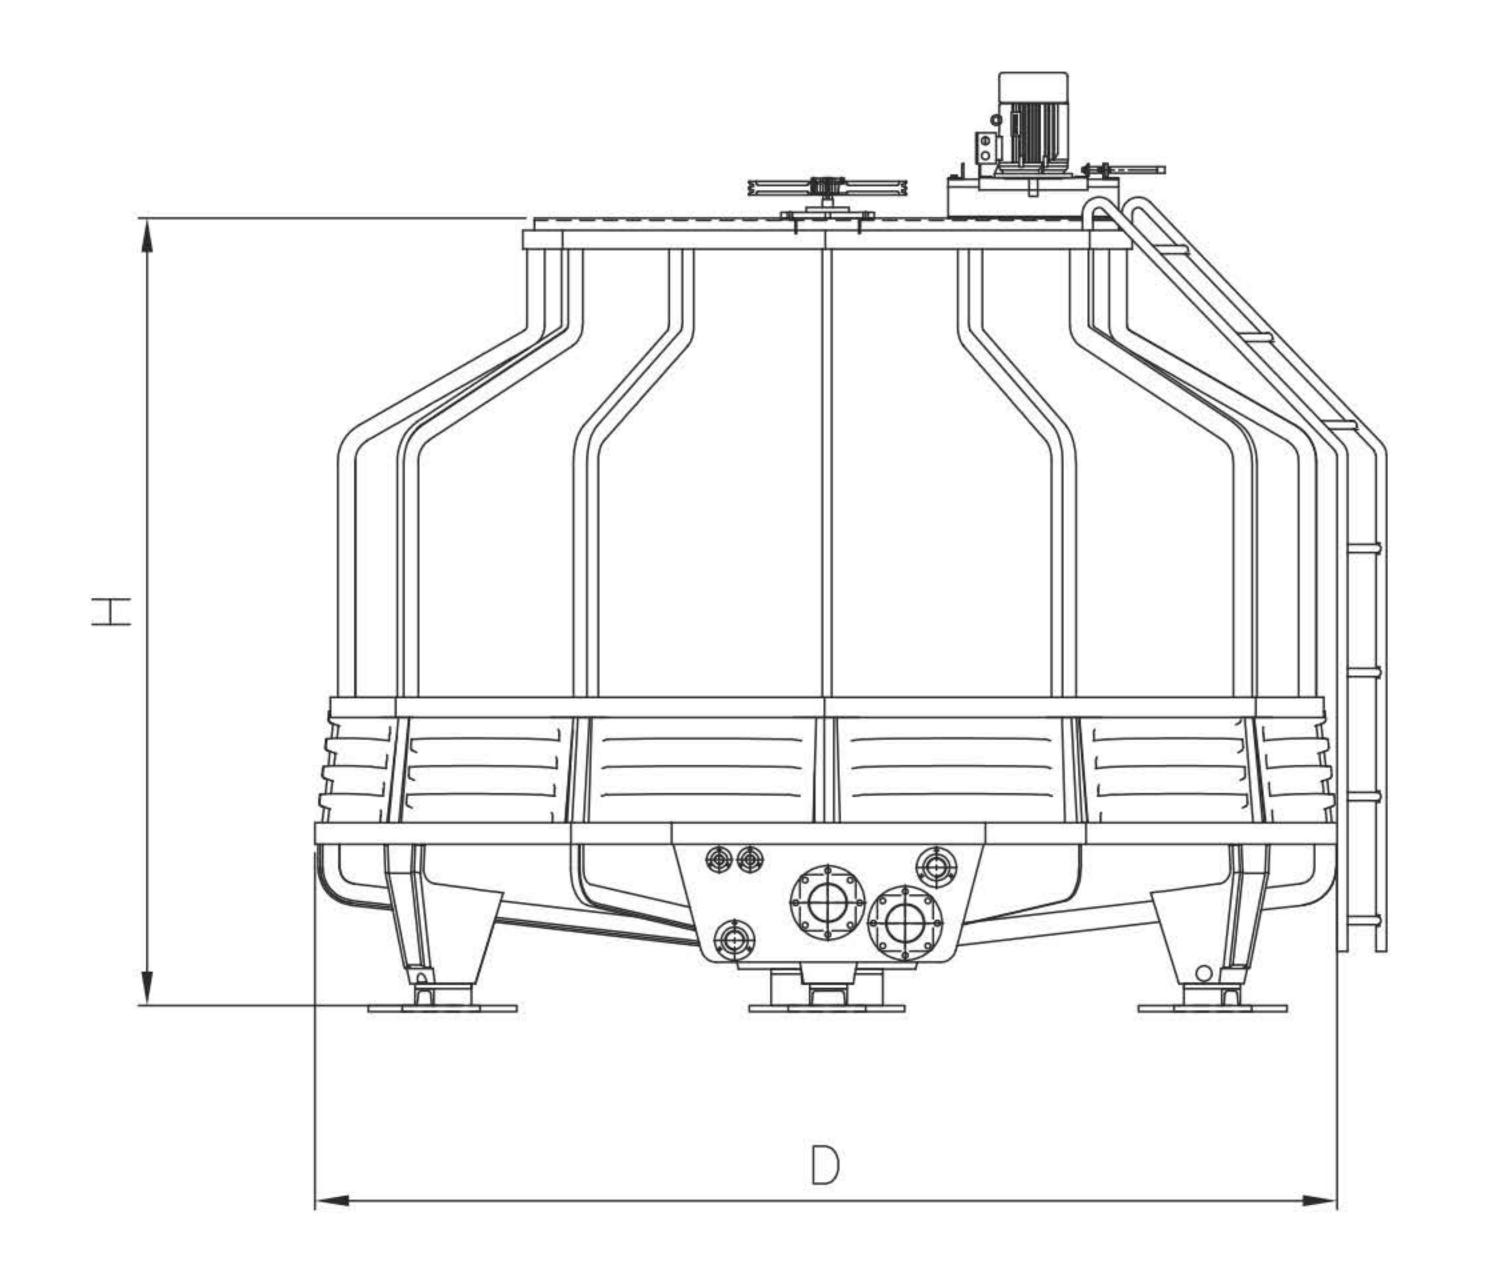

For more details please scan the code

Product Detail

These units Are cylindrical shaped design and suitable for any outdoor cases installation and operating without problem at all situation. These Cooling Towers are made of FRP (Fiberglass Reinforced Polyester). The composite has excellent chemical and mechanical properties. It is corrosion free and stabilized against sun lights ultra violet radiation. FRP has no effect on circulating water's chemical balance. This material also is not an environment for algae to live or grow. این مدل از برج های خنک کن به شکل استوانه ای طراحی شده است و مناسب برای نصب در محیط خارجی و کارکرد بدون مشکل در همه شرایط آب و هوایی می باشد. برج خنک کن از FRP ساخته شده است. کامپوزیت مورد نظر دارای خواص شیمیایی و مکانیکی فوق العاده ای است. این ماده ضد خوردگی در مقابل اشعه های نور خورشید و پرتوهای ماوراء بنفش پایدار است. این ماده اثر شیمیایی روی آب در گردش ندارد. این ماده همچنین محیط مناسبی برای رشد جلبک نمی باشد.

details For more please scan the code

Product Detail

Vacuum boiler is a machine used in the air conditioning industry to produce hot water and domestic hot water for heating and other industrial applications. In vacuum boiler machine, due to vacuum conditions, the internal rust has been reduced by 99%. It operates under negative pressure, which ensure boiler not explosive. On the other hand, in terms of special design, this machine is able to supply domestic hot water without hot water heat exchanger.

• دیگ خلاء دستگاهی است که در صنعت تهویه مطبوع جهت تولید آبگرم مصرفی و آب داغ جهت استفاده در گرمایش و سایر کاربردهای صنعتی استفاده میشود. در دستگاه دیگ خلاء بواسطه ايجاد شرايط خلاء يديده يوسيدگى داخلى تا ٩٩ درصد کاهش یافته و همچنین تحت فشار بودن دستگاه منتفی گشته است. ازطرفی با توجه به شرایط خاص طراحی، این محصول قابلیت تامین آبگرم مصرفی را بصورت همزمان و بدون نیاز به مبدل حرارتی جانبی دارا میباشد.
